

Simplifying Workforce Management

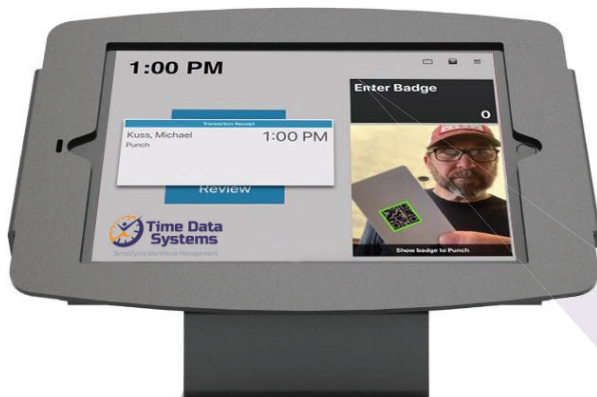

# Reduce Exposure and Stay Safe No Touch Punch™ Is Here!

**No need for employees to touch the time clock with this NEW scanning feature available using Time Terminal!**

Reduce your employees' exposure by turning on the new **No Touch Punch™** feature on your Time Terminal.

Now, more than ever before, it's important to keep your employees healthy. Our new No Touch Punch feature enables an employee to present a QR code or barcode; and thus eliminating the need to touch the device.

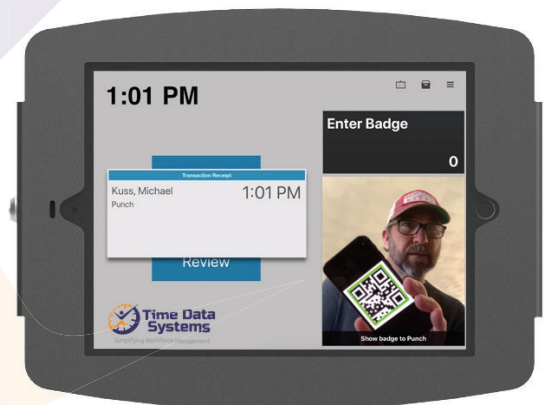

**Employees can clock in and out by using a standard badge or label, or by using a QR code image from their smart phones!**

If you are a current client, call us today to turn the feature on – and if you are not a client yet, call us to find out more!

**Do the right thing and put your employees at ease with this new feature.**

## Time Terminal Supports Social Distancing and Is Simple to Use!

- Create and send employees a QR code.
- Employees display the code on their phone to clock in and out, without touching the iPad (Devices are typically wall mounted).
- Time Terminal captures the punch in real-time and connects with Attendance on Demand.
- If an Internet connection becomes unavailable, punches remain stored in the device until the connection resumes.
